

# BLUE CASTLE

## Padded waterproof thermal suit

### Ref. 311

**Premium protection in cold, wet environments with a Blue Castle padded waterproof thermal suit.**

The Blue Castle 311 padded suit is manufactured from a rugged, waterproof, PVC coated nylon shell, with a quilted insulated lining.

The front zip is double ended, providing a zip fly and is protected from water ingress by dual, overlapping storm flaps with Velcro fastenings.

Knitted collar and arm cuffs for maximum comfort. The arm cuffs are inset into the sleeve for additional protection from the wet.

A removable zip fastened hood with draw string and press stud chin strap provides superior protection in extremely cold environments.

Lower leg zips up to the knee for easy fitting over large boots.

Secure zip fastened chest pockets with rain covers. Two front waist pockets with protective flaps.

A full width elastic waist maintains body shape, minimising loose material and providing a safer garment for use around moving machinery.

Removable hood

Colour	Sizes
Navy blue	M - XXL
